## Survey Results (Included Responses)

[REPORT OVERVIEW](#)

### Lindop Technology Survey

Questions that required written responses are displayed by individual query. The "Report Overview" button or "Back" button will return you to your survey results.

Each individual respondent is referenced under the # column.

#### 4 What are some concerns you have about using technology in your classroom?

#	Response
1	I am fine using technology in my classroom. For question number one it is the same because I felt I was using it a lot then too.
2	Placement of T.V monitor with computer hook-up. Location of computers in classroom
3	1. computers often freeze and we have to stop. 2. I need and appreciate ideas such as when you taught the weather lesson in laptop lab-you said you had other great lessons
4	Imovies are difficult to transfer to a usable medium. I haven't been able to transfer to DVD and had difficulty going to VHS. We need better technology to supplimnet what we have.
5	Can not always get to the programs each time. The children have tech problems and need assistance. More available programs on the computer for the students to use.
6	I would like a wider variety of games for the students to experience.
7	I still am leary of technology driving plans because of mishaps. For example, computers crash etc. or something doesn't work as it's supposed to ie. lab reservation glitch.
8	Time crunch !!
9	Use of the TV is difficult because it chsnge the settings in the computer and can only be done from the one computer. First graders have a hard time with group instruction when they can't "do it" right away after the lessson.
10	time to learn stuff and then really do it
11	I don't like the computer to only be an encyclopedia for research, and yet I am having difficulty finding simple projects for my students to do. Research projects on the computer is almost as fruitful and productive as keyboarding. I need ideas and help with projects that can be frequent, not one time dealies.
12	None
13	Making sure kids go to appropriate sites.
14	Computers not working all the time and having to wait to find out what is wrong. Not always knowing how to use the computer with a specific project.
15	The old computers are too slow. They break down alot.
16	There aren't enough hours in the day ! Also tech Camp suggestions - we don't always know what to ask for.
17	I have concerns about what to do with my students, if all the equipment will be working when I need it, what do I do when something goes wrong, and finding the time to integrate technology.
18	Not enough computer/icams/laptop for all students in class. Not getting claws when I need it.
